

The Axioms of Civilization

kong weicheng

Axiom 1 | Existence is Life

Existence and life are not separate. Every form of existence is a form of life, differing only in level and complexity.

Axiom 2 | Life is Expression

The essence of life is not stillness, but the continuous expression of energy and information.

Axiom 3 | Expression Drives Evolution

Expression propels existence toward complexity: energy becomes matter, matter becomes life, and life becomes civilization.

Axiom 4 | Structural Necessity

All life and civilizations depend on minimal structures: information, resources, absorption, reproduction, institutions, values, immunity, and cooperation.

Axiom 5 | The Closed-Loop Principle

Without the loop of input – process – output – defense, no system can endure.

Axiom 6 | Immunity as Necessity

Without immunity, every existence is dissolved by internal cancer or external assimilation.

Axiom 7 | Direction and Cooperation

The prosperity of civilization depends on its value orientation and the quality of cooperation among individuals.

Axiom 8 | The Law of Evolution

All existence is in a state of evolution. Healthy structures tend toward creation; cancerous structures tend toward destruction.

文明公理

第一公理 | 存在即生命

存在与生命并无区别。所有存在皆为生命的形态，只是层级与复杂度不同。

第二公理 | 生命即表达

生命的本质不是静止，而是能量与信息的持续表达。

第三公理 | 表达驱动进化

表达推动存在走向复杂：能量化为物质，物质化为生命，生命化为文明。

第四公理 | 结构必然

一切生命与文明必然依赖最低结构维系：信息、资源、吸纳、繁衍、制度、价值、免疫与协同。

第五公理 | 闭环原理

没有输入—处理—输出—防御的闭环，任何存在都无法持续。

第六公理 | 免疫必需

失去免疫的存在，必然被内在癌变或外部同化消解。

第七公理 | 方向与协同

文明的繁荣取决于价值方向与个体协同的质量。

第八公理 | 进化法则

一切存在皆处于演化之中。健康结构趋向创造，癌化结构趋向毁灭。
